

source/timer.h

```
graph TD; A[source/timer.h] --> B[stdbool.h]; A --> C[time.h];
```

The diagram illustrates the header file dependencies for source/timer.h. It is a hierarchical structure where source/timer.h is the parent header, and it includes two child headers: stdbool.h and time.h. The parent header is represented by a gray box, while the child headers are in white boxes. Blue arrows point from the parent to each child, indicating the direction of the include relationship.

stdbool.h

time.h
